

I am an avid listener of air 1 on 104.9fm. I am writing this because i heard that air 1 might be going off air due to LPFM provinding something else in the place of air 1. Please dont do this. As a college student it is so comforting to me to have air 1 where i live because my family is so far away but yet we can listen to the same radio and they dont seem so far away. If air one were to be removed i think maybe people would be sad. Because i know many people in my area who listen to air 1 and there would indeed be something missing in the community. so please dont take air 1 off the air. thank you
